

Thirayu Meerersom

Technology Leader · AI Researcher · Digital Transformation Consultant

PROFILE

Ph.D. researcher and full-stack technology leader with 15+ years bridging advanced technology (AI & software architecture) and business strategy (MBA). Proven record delivering national-scale AI healthcare platforms for Thai government agencies and enterprise solutions for global clients in Switzerland and the USA. Peer-reviewed author published in Scientific Reports (Nature portfolio).

SELECTED EXPERIENCE

Biz & Tech Consultant

Aug 2019–Present

KASIRA HOUSE Co., Ltd.

- Directed national-scale AI healthcare platforms (AI-OVCCA, AI-Malaria, AI-Snaily) across provinces with NECTEC & the Ministry of Public Health.
- Designed scalable microservices (Docker, Kubernetes, Kong) and led KH-RMS hospital & KH-School delivery on .NET Core 8 + Angular.

Researcher

Aug 2019–Present

Parasitic Disease Research Center, SUT

- Researcher at PDRC (SUT)

Senior Technical Partner (Remote)

2009–Present

PEZZ AG, Switzerland

- Sole technical partner for 15+ years; modernized legacy systems to cloud SaaS and iOS/Android with ~99.9% uptime across Europe.

EDUCATION

Ph.D. Candidate, Translational Medicine (International Program)

2018–Present

Suranaree University of Technology

Master of Business Administration (MBA)

2008–2010

Khon Kaen University

B.Sc. Computer Science

2004–2008

Khon Kaen University

HIGHLIGHTS

- Published in international peer-reviewed journals incl. **Scientific Reports** (Nature); 18+ research works — ORCID 0000-0001-6414-3607.
- Invited speaker/trainer for Office of SMEs Promotion (OSMEP), Ministry of Public Health, Ministry of Higher Education, Science, Research & Innovation (MHESI), Ministry of Social Development & Human Security, Department of Disease Control, Department of Health, Thai Media Fund, and more.

SELECTED PROJECTS

- AI-Snaily** — Real-time YOLO detection of liver-fluke host snails (98.7% accuracy) — basis of the 2026 Scientific Reports paper.
- AI-OVMIF / AI-Helminths** — Parasite-egg detection AI (OV, MIF, Cs, Ec, AI, Tt, Tspp) for DDC and NECTEC.
- AI Malaria & AI Leprosy** — Computer-vision diagnosis tools for DDC and Rajpracha Samasai Institute.

CORE SKILLS

FRONTEND

HTML5, CSS3/SASS, JavaScript, TypeScript; Angular, React/Next.js, Vue/Nuxt.js; Webpack/Vite; Bootstrap, Tailwind, Material UI

BACKEND

.NET / .NET Core (C#, VB.NET), PHP (Laravel), Python (FastAPI/Flask), Node.js/Express, Java; REST & WCF Web Services, LINE LIFF/Messaging API

AI / DATA

Computer Vision (YOLO, TensorFlow/PyTorch), Deep Learning, NLP, Data Science, SARIMA/Time-Series forecasting, Business Intelligence

DATABASES

MS SQL Server, MySQL, PostgreSQL, Oracle; MongoDB, CouchDB, Elasticsearch; Neo4j (graph); RabbitMQ; Redis

CLOUD / DEVOPS

Docker, Kubernetes, Kong API Gateway, NGINX, Portainer; Azure, AWS, GCP; CI/CD (Azure DevOps, GitHub Actions); VMware; Linux / Windows Server / macOS

MOBILE

Android (Java), iOS (Objective-C, Swift); Flutter/Dart, React Native, Ionic; Unity

BUSINESS / OTHER

Agile & Waterfall, BA/SA, System & Platform Architecture, UI/UX, ERP (Odoo, ERPNext), IoT/RFID, MarTech, Adobe Creative Cloud, SME Coaching
